

## ***EOL Bench for Electrical Steering Locks Testing with CAN Interface***

### **Product description**

- Automotive, single-operator Bench
- 2D barcode final print for traceability with confirmation reading after application over the tested part
- Functional electric check and customized data programming
- Standby and working currents check
- Torsional check with currents/torques verifications
- Contactless check of the default/active locking bolt positions
- Rejected parts segregation inside a sensorized box
- Interchangeable Fixture for using with different products shape
- The whole test split into two stations stations in order to reduce the process time

### **Technical specifications**

- Electric Supply 230V, 50/60 Hz
- Pneumatic Supply 5/6 bar
